

INSTRUCTIONS | REVERSE FRENCH

STEP 1:

After proper nail prep and tip application, apply **Essential Bond** to the natural nail. Remove the brush from the bottle and wipe along the edge of the bottle, then brush onto the natural nails. Allow to dry for one minute. They will not appear chalky white.

STEP 2:

Before you begin sculpting your enhancement, apply an even layer of **Essential Base Coat**, this thin layer will ensure that proper bonding and adhesion will occur for the subsequent layers. Cure in **Dual Cure Lamp**, LED for 30 seconds or UV for 2 minutes.

STEP 3:

Squeeze out and slice a small amount of the **PolyPaste Cover Pink** and roll onto the natural nail. (You can always add more product if needed.) Dip the brush end of your **PolyPaste Tool** into **Cleanse** and dab off the excess liquid. Be sure to not wipe away too much of the **Cleanse** from the brush. **Cleanse** helps to move **PolyPaste**, and will keep it from sticking to the brush.

STEP 4:

Lightly pat and push **PolyPaste** into shape with the moist brush. Ensure that the body and smile line edges are neat and smooth for the white application to be applied up against. (You can always add more product if its needed.) Cure in **Dual Cure Lamp**, LED for 60 seconds or UV for 2 minutes.

STEP 5:

Squeeze out and slice a small amount of **PolyPaste Soft White** and roll onto the edge of the free edge. Lightly pat and push **PolyPaste** into shape with the moist brush. Push up against the ledge you made with your pink **PolyPaste**. Cure in **Dual Cure Lamp**, LED for 60 seconds or UV for 2 minutes.

STEP 6:

Refine file using your **Endurance 180/180 Grit File**. Check for proper design and apex placement. File the nail so it is smooth, balanced and attractive following the curvature of the nail. Remove excess dust with your **Plush Brush**. Use a **Nail Wipe** saturated with **Cleanse** to remove any dust that may be hiding in the side walls.

STEP 7:

Apply **Essential Seal** and cure in the **Dual Cure Lamp** for 30 sec or UV for 2 min. Wipe off the tacky dispersion layer using a **Nail Wipe** saturated with **Cleanse**. Condition the cuticle and surrounding skin with **Nurture Oil**.
