

## CONGRATULATIONS ON YOUR GLAZEME PURCHASE!

### Getting started....

- Prior to using the chrome powders, you should ensure that you have all the necessary items which include:
  - GlazeMe Base Coat** (which can be purchased individually in our store)
  - GlazeMe Colour Coat** (Tarmac Black, Cotton, or a colour of your choice)
  - Iso Wipes**
  - Small Sponge Applicator** ( Included with your chrome powder )
  - Soft Brush** ( to remove excess powder )
  - No-Wipe Top Coat** (which can be purchased individually in our store)

### How to apply the GlazeMe Chrome Powders

- 1. Prepare nails as you would for normal GlazeMe polish application.
- 2. Apply the GlazeMe Base Coat & cure for 90 seconds.
- 3. Apply GlazeMe “Tarmac Black”, “Cotton” or for the mirror powder, the colour of your choice & cure for 90 seconds.
- 4. Apply GlazeMe No Wipe Top Coat & cure for 90 seconds.
- 5. Using the applicator provided, apply GlazeMe Chrome Powder (a small amount goes a long way) and work the powder in by using a rubbing motion. The more you rub, the smoother the finish.
- 6. Using the GlazeMe Fanned Nail Brush, remove any excess powder, including any around the grooves and edges of the nail.
- 7. Apply GlazeMe No Wipe Top Coat & cure for 90 seconds.

Tip: To clean up any chrome powder on the fingers, just use an Iso Wipe. It is fine that this comes into contact with the finished, cured nail.
